CCBVO

### **Preamble**

Centre for Capacity Building of Voluntary Organization (CCBVO) has been working in Rajshahi District as a development organization since last Twenty (20) years. CCBVO has expanded its programs and capacity gradually by implementing comprehensive program for identically poor, mostly oppressed, neglected and disadvantaged people. The organization implements its working strategies through rights based approach and strive to develop human and natural resources. Therefore, CCBVO is implementing program for basic rights of human being, in addition to the climate change, disaster management, legal supports, and awareness building on rights to information program besides, women empowerment to reduce violation against women.

The annual report 2018 reflects the real impression of organizational diversified development programs.

I do hereby express my gratefulness and gratitude to the Govt. Departments working with CCBVO and related Donors for their extended cooperation; besides, I do express my best wishes and regards to all honorable members of the General Body and Executive Committees for giving proper decision and guidelines. I express my gratefulness to all well-wishers. I Give thanks and gratefulness to Chief Executive of the organization for his chronological direction along with Program Director, all Project Coordinators, Supervisors and Voluntary-Organizers for their valuable contributions. In fine, I am wishing their good health and long life.

Md. Sarwar-E-Kamal  
General Secretary  
Executive Committee  
CCBVO

### **Editorial**

**“Centre for Capacity Building of Voluntary Organization (CCBVO)”** is working in north-west part of Bangladesh since last 20 years. The organization gradually expanded its activities to address the basic needs and rights of the people live in Barind tract. CCBVO is working with comprehensive outlook for socio-economic development program for disadvantaged ethnic minorities; day laborers, marginal farmers, share croppers, youths, along with students all children-adolescents, upgrading natural environment, and sustainable development with the other fragment of the society.

During the reporting period the significant outweigh was given on Rokkhagola village based sustainable food security program, science education in secondary school level, awareness building on family and social law through community legal support services, awareness building on rights to information, under this movement different human rights activities implemented.

During the reporting period some essential activities were given priority to achieve basic needs of the people live in grass-roots level those were: social organization, eliminating food-poverty, reducing economic-poverty by using local resources and local social safety-net service institutions, gender equality, social practices for women empowerment, cultural development of ethnic communities, total development of education sector including science education, awareness building on public health (sanitation, primary health care, child and mother health and HIV/AIDS), rights to information, and support to establishing good governance and social accountability.

All honorable members of Executive committee and General Committee of the organization always have given all-out efforts, suggestion and instructions and accordingly the Program Director, all Project Coordinators, Supervisors, Voluntary-Organizers and their perfect role helped to achieve qualitative performance and positive milestone of the organization. The government line departments and other national-international donor agencies have been working with CCBVO and extended substantial contribution, remarkable cooperation and support to us. Besides, we do express our gratefulness and gratitude to our friends and journalists involved in print and electronic Medias of different local and national dailies for their remarkable contribution. Again we express our sincere thanks to all for keeping bright role from their own position and wishing good health.

11. Governance Development Program
12. Advocacy and Net-Working

**CCBVO Annual General Meeting 2018 held at Cookijer Restaurant**

**CCBVO Executive Committee held at head office in 2018**

## 3. Ongoing Projects/ Programs

### 3.1. Rokkhagola Village Based Sustainable Food Security Program for the Ethnic Communities in Rajshahi

**3.1.1. Goal of the project:** Socio-economic, cultural conditions improved towards sustainable development of the ethnic communities in Rajshahi district.

**3.1.2. Objectives of the project:** Food security of the member families of Rokkhagola organizations improved.

**3.1.3. Broader objectives of the project:**

- Enhance capacity of the Rokkhagola organization in the working area for sustainable food security of the ethnic communities, access to local resources.
- Planting fruits trees in the working areas, enhancing socio-economic-cultural capacity of the reference people, Rokkhagola pre-primary school, reducing poverty of the ethnic communities by utilizing health-sanitation services.
- Increasing capacity/ quality of ethnic voluntary village organizers and workers

**3.1.4. Project beneficiaries:** All ethnic female-male-children of the organized families of the Rokkhagola village based social organizations live in project areas are the direct members of the project.

**3.1.5. Background of the Project:** Rajshahi district belongs in the Barend tract of north-west part of Bangladesh, which is highly dense, backward, poverty-stricken area. Different ethnic communities along with greater Bengali people live in this area. According to census report of Bangladesh Statistical Bureau, 2011, the total population of Rajshahi District approximately 25,95,197 among these 12,85,307 female and male about 13,09,890. Ethnic people live in Rajshahi approximately 61,824, which 2.38% of total population. Besides, as per Bangladesh Statistical Bureau report the total people of Godagari is 3, 30,924 among these female 1, 64,664 and male nearly 1, 66,260 live in Godagari upazila. The ethnic people live in the upazila 30,314 among these female are 15,337 and 14,977 are male i.e. ethnic people are 9.16% of the total population. The said project has been initiated to make food security of the ethnic people and improvement of livelihood.

Total ethnic villages are 110 in 9 unions consisted under Godagari upazila of Rajshahi district, the project continues in 30 villages under 3 unions namely Deowpara-15 villages, Gogram-12 villages and Mohonpur-3 villages. Naturally, the project area (Godagari Upazila) is identified as most drought prone area of north-west part of Bangladesh, the main occupation of people in these areas rain fed agriculture, while paddy is the main crop.

Considering the nation context the yielding of crop is low in these areas and due to drought over a prolonged period, which characterized backward places for livelihood. Moreover, the Barind is treated as drought prone backward region. From the different survey reports it is known that 87% families of ethnic minorities are landless, 5% are marginal, 3% medium farmers, 2% are rich farmers and rest 3% are involved in different occupation. They are facing hardship in their daily life, in addition different oppressions, negligence and exploitations by the land owners and normally not getting proper share of the crops. As they have no many alternative means of occupation therefore; they have to remain unemployed about 6 months in a year. Considering, the above socio-economic status of the reference people, CCBVO implementing this program form since 2003. Presently The Peoples' Republic of Bangladesh has taken special attention and developing specific policies for them.

**3.1.6. Rationale of objectives with the national planning:** Reducing poverty by human resource development and increasing income to achieve NSPR-2, projected goal/objectives- 2021 of the present Bangladesh Government or the ruling party who leaded liberation war and freedom fighting. According to above vision of the government Centre for Capacity Building of Voluntary Organization (CCBVO) has planned the program to implement in the Barind tract through which reduction of poverty and other objectives are included, like women empowerment and social organization for gender development, "village based sustainable food security", "social capital formation", increase access to social safety-net, human resource development, "pre-primary education by mother language", etc are being implemented intensively and in future will be continued.

**3.1.7. Continuation of the Project:** At the out-set beginning of the project 90% of the ethnic minorities remain below poverty line. Mainly, they faced food crisis in the monsoon period that time they used to

borrow money from the local rich people or money lender with a higher rate of interest (100-120%) for food, treatment, house repairing etc. Normally, they paid back their loan money by selling crops. In maximum cases they can't refund the full borrowed money, therefore, confined in the crisis. To overcome the situation, CCBVO inceptioned Rokkhagola village based sustainable food security program since 2003 after completing field level research and findings. The ethnic minorities had taken all responsibilities, and initiated their own social organization and village based food bank. By this time this project completed pilot phase 1st and 2nd phase at present 3rd phase is running. In all phases CCBVO has been implementing planned, logical and rational activities towards sustainable food security and social development as follows:

- a) **Pilot phase supported by Bangladesh Freedom Foundation (BFF) 2005-2012:** At the outset CCBVO inceptioned Rokkhagola village based sustainable food security program since July 2005 continued up to December, 2012 at Deopara and Gogram unions of Godagari upazila, initially started with 5 selected ethnic villages with the support of Bangladesh Freedom Foundation, (BFF) and gradually up to 16 Rokkhagola ethnic villages under action research program to make the ethnic people organized where people had taken self initiative to stock handful rice seasonal paddy to use in lean or disaster period, through which they enabled to reduce food crisis and took initiative for fighting against hunger.
- b) **First phase 2013-2014:** With the support of Bread for the World, Germany in 26 villages of Deopara union and Gogram unions under Godgari upazila of Rajshahi In this phase CCBVO implemented Rokkhagola village based sustainable food security program. Through this program the ethnic communities live in Barind tract with the spirit of their own culture they more strengthen the Rokkhagola village organization by improving this process they bring female and male equality or gender development and they achieved social ability to take initiative to overcome the food-poverty- cycle. By this program they establish "Rokkhagola food bank" strengthening, and making aware all organized families and increased homestead gardening and livestock is rearing activities. As a result every family regularly deposits food at food bank and tanjectiun of food according to need. Therefore, they could exceed all hurdles towards free from hunger by getting ability of cereal food or rice- pulse and vegetable.
- c) **Second phase 2015-2016:** With the support of Bread for the World (BftW), Germany CCBVO implements Rokkhagola village based sustainable food security program in Deopara, Gogram and Mohonpur unions under Godagari upazila where in 30 ethnic villages Rokkhagola village based food security program has been implemented. That is important to understand how much target has been achieved by the organized families with Rokkhagola. In this phase initiative has been taken to measure the basic three components of food security that was given high priority. The target people had been given the basic knowledge and concept on food security, which includes three basic elements of food security i.e. a) food availability at community level b) peoples access to food and c) ability and behaviour of people in taking quality or balance food. It was observed that 80% of families had food availability and achieved easy access to food; only 60% families and 55% families had basic food security.
- d) **Current Third phase 2017-2019:** With the support of Bread for the World (BftW), Germany, Total listed in 30 ethnic villages under Deopara, Gogram and Mohonpur unions under Godagari upazila and after implementation of Rokkhagola village based sustainable food security program it is predicted that at least 70% organized families will be able to have carbohydrate, vitamins, and protein mixed food. Under poverty reduction program along with the sustainable food security, through the village based social organization women empowerment, gender development, capital formation and investment for income generating activities, access to social safety-net, human resource development, pre-primary education by own language will be comprehensively implemented. Food security and others achievements of the above mentioned ethnic communities' progress monitoring data will be regularly collected through field level data collection format and explanation as well

### 3.1.8. Description of Project Activities:

- a. **Sustainable food security, access to local resources and strengthening Rokkhagola Village organization:** In present world earlier conceptual view of food security has changed. Availability of food, Accessibility of food and affordability these three altogether are known as food security. So not only rice or protein or carbohydrates isn't source of human physical power but also they must have ability to take ingredients of balance food such as carbohydrates, protein, vitamins and minerals. Therefore, CCBVO considers food security is the man problem and planned those within three years of period 70% member families of Rokkhagola organizations have at least 3 meals including vegetable a day, and have at least 3 meals in a week with protein. Taking initiative to campaign I favor towards awareness building on food security and food rights in this connection CCBVO is using fillip chart, poster, and leaflets etc materials. Moreover the organization has taken different activities in 30 Rokkhagola village organisation under the village based sustainable food security "Rokkhagola food bank "on account of emancipation of

food crisis of the organized families onward stability increasing food savings. Besides, CCBVO encourages every family for establishing homestead garden with drought tolerant vegetable, organic vegetable cultivation and livestock rearing by enhancing fish culture and progressing towards mitigation of vitamins and protein gradually for organized families.

CCBVO considers social organization is an essential need for socio-economic development of the targeted people along with food security. For this reason CCBVO implementing various activities emphasizes on basic four pillar of the social organization such as structure of Rokkhagola, Policy, Leadership and Socio-economic management. Rokkhagola village organizations develop substantial capital by selling excess food stock. The ethnic people are taking small income generating projects by using this capital and income is increasing at family level. This assists to create employment for them and enhanced purchasing capacity. During the reporting period peoples' access to government social services, especially in treatment, social safety-net service increased. With the social initiatives by social empowerment the social position of the ethnic communities has increased.

**Paddy production increased at Rokkhagola villages in the working area**

- b. Fruit tree plantation, Socio-cultural empowerment, Rokkhagola Shishu Pathshala, Health and sanitation:** For preserving environment of project area CCBVO raising awareness among the people about tree plantation, drought resilient crops cultivation, selecting vegetable seed and growing, compost fertilizer making and use etc. Moreover, sharing meeting with local administration, MP, Other stake holder, Training on advocacy and lobby with local govt. administration, National and historical day observation, cultural competition etc initiatives have taken for socio-economic empowerment of targeted people.

Besides, most of the ethnic communities have lost their own cultural practices and heritage. In fact, the ethnic communities now are losing own cultural tradition, values, custom, heritage etc., because of generation to generation prolong negligence, surrounding constrains, pressures, obstacles and communal forces. Social alienation, political recognition and fewer opportunities, cultural adaption are the main cause of hampering their cultural identity and regular practices. It is observed only inclusion and lack of practices the new generation are losing their interest to demonstrate their own cultural practices.

Therefore, CCBVO has given more priority and during the reporting period and taken initiative ethnic cultural collection and preservation through Rokkhagola cultural sub-committees. To give institutional pattern of the organized village based cultural teams and building their performing capacity with the support of Divisional Ethnic Cultural Academy, Rajshahi. Besides, the cultural practices are continued. The cultural sub-committee of Rokkhagola organization organized cultural practices and competition, national day's observation and in the historical days of ethnic communities they have performed own culture and traditional arts and culture, by which, they have started to perform their own traditional songs and dance. Historical day observance means, Santal Hool day, Birsa Munda Day, Kuspaharia day, International Mother Language day, Independence day the organized leaders and members were directly involved in organizing and participation to observe these days. They have initiated to collect their own traditional knowledge and skills for recurring in their own culture and society. In the competition the ethnic communities projected their traditional wedding ceremony, karam, dashai-karam, dong, large song and dance. Total 520 female and male performers took part from 30 Rokkhagola cultural teams.

Primary health care service is still out of reach of the people of ethnic communities. Less access to health services of female and children is prevailing in the ethnic communities' across the working areas. These are

interlinked with water and sanitation, unhealthy situation, health, food and nutrition. Therefore, the project implementing organization has taken initiatives to enhance awareness through Rokkhagola health and education sub- committees.

**Fruit tree saplings distribution to the Rokkhagola member families in the working area**

**Annual cultural competition among Rokkhagola villages at Gunigram High School premises**

- c. **Capacity building of project staff, Baseline survey, Assessment of progress performance monitoring of the project:** CCBVO organize Follow-up training and meeting about Food Security, Food Rights, and Nutritious food intake, health and hygiene, drinking water, sanitation and environment campaign for enhancing efficiency of staff. Besides this organization arrange workshop on OIO (Outcome Impact Orientation) focus project implementation, monitoring, and evaluation. Moreover, CCBVO arrange bi-monthly meeting regularly in order to observe project implementation progress, obstacles and necessary step to overcome the problem. In every six month progress performance survey conducted by CCBVO where collected data analyze through SPSS and organization measures the improvement.

**Training on Organizational Development of Rokkhagola at Adorshogram village organization**

### 3.1.9. Project Achievements Output level:

Sl. No.	Subject	Location	Resource persons	Participants and No. of Event	Number of Participants		
					Female	Male	Total
a. Sustainable food security, Access to local resource and Capacity enhancing of Rokkhagola:							
1.	Day long training on duck-poultry and livestock rearing	Agolpur Rokkhagola	Dost Mohammad, Vat nary field assistant (VFA) Upazila livestock department.	Organization leaders Target-1 Achivement-1	05	24	29
	Training on Drought resilient crops cultivation, fishery.	Farsapara Rokkhagola	Md. Shamsul Karim, Upazila fishery officer.	Organization leaders Target-1 Achivement-1	05	29	34

### 3.1.10. Project Indicator and Progress according to indicator:

Project indicator	Achievements of indicator
1. By the end of the project period 70% member families of Rokkhagola organizations have at least 3 meals including vegetables a day and have at least 3 meals in a week with protein.	1. 67.5% member families of Rokkhagola having at least 3 meals with vegetables and 48.12% families taking at least 3 meals with protein in a week. Averagely 57.8% families taking balance food.
2. By the end of the project period 50% member families of Rokkhagola organizations are receiving at least 1 safety net service from government programs/ schemes.	2. 37.5% member families of 30 Rokkhagola village organizations having at least 1 safety net government scheme.

### 3.1.11. Project Outcome:

- Social status of the reference people increased.
- Women leadership has developed in the Rokkhagola Organizations.
- Health status improved in Rokkhagola villages and child- mother mortality rate reduced.
- Income and savings have increased among the member families of Rokkhagola.
- Rokkhagola social capital has increased.
- Education rate among the youth of Rookhagola have increased.

Rokkhagola leaders sharing their opinion with Upazila administration of Godagari

## 3.2. Promoting Science Education (PSE) program

**3.2.1. Introduction:** CCBVO conduct a survey to get real situation of science education in 2010 in 20 education institutions with the support of Bangladesh Freedom Foundation (BFF) and it shows that specifically science group students are decreasing gradually and there is no qualitative improvement in science education. There are several reasons behind this such as student's difficulty to understand, people think it's expensive, less tutorial classes at school, scarcity of efficient teachers, infrastructural bindings and shortage of laboratory instruments etc. For changing this situation CCBVO implementing "Promoting Science Education (PSE) in Secondary Schools" program since 2012. At present in 40 educational institutions at Godagari and Paba upazila under Rajshahi district. The main running force of this project is Science clubs which have been formulated with respective institutions students. Science clubs are erasing science fear among student and making them interested about science. Members of science clubs study different scientific theories altogether and prove those theories by using low cost materials in front of the general students. Further by using these theory or rules scientific project or poster is being made by them for presentation in science fair. Moreover they publish wall magazine and arrange Quiz and Debate competition where every general student can participate.

**3.2.2. Project Goal:** Through science club student's interest about science education enhanced

### 3.2.3. Project Objectives:

- Qualitative development of science education.
- Making science practice popular by erasing science fear.
- Making student's science minded.
- Creating physical opportunity of laboratory in respective school with their own invented instruments.
- Promoting potential students at national level with their inventions.

**General meeting of Science Club members at Palpur High School**

**3.2.4. Project Beneficiaries:** A direct beneficiary is about 16,888 individuals among them female 8,952 and male 7,936. And indirect beneficiary is about 16,000 individuals among them female 8500 and male 7500.

**Information about Teacher and Students (2012-2018):**

No. School	Year	No. Teacher		No. Science Teacher		Total Student		IX class Science		X class Science	
		Female	Male	Female	Male	Female	Male	Female	Male	Female	Male
20	2012	68	163	10	34	3734	3525	138	202	106	144
20	2013	71	164	15	36	3835	3573	154	214	137	188
20	2014	72	172	15	35	4293	3932	220	224	149	214
30	2015	104	268	18	54	6332	5752	328	367	290	328
30	2016	107	297	22	63	6250	6023	396	403	302	358
40	2017	138	350	26	69	8873	7765	598	546	489	519
40	2018	136	349	28	65	8952	7936	538	571	548	541

**3.2.5. Project's main implemented activities information:**

**1. Science club formation/reformation :**

Currently in the project area 40 science clubs are running activities in their respective educational institution which have been operated by students for the development of science education. Interested students include themselves as a member and take operating responsibility of the club. Club members regularly pay subscription fee and encourage general student about science by performing voluntary service to implement various club activities. Each year class six students of these institutions are being informed about science club activities in order to reform general committee. Depending on interested student's opinion science clubs membership list formulated. In case of executive committee formation election process are being followed where all members, teachers and possibly with head master general meeting held in a room. Therefore new committee is being elected to operate science club activities by direct voting against different post candidate. In same process science club has been formed in 2018.

**2. Annual activities planning of science club:**

Annual activity plan is made in order to implement various science club activities successfully. Basically Executive member of science club, interested general member, and advisory body attend in the annual planning meeting. In this planning various year long activities, specific time schedule for implementation, and responsibility of the members is being predetermined in this meeting in light of organization's objectives. Therefore schedule plan hang up with paper/art-paper/banner in a suitable place whether every student of the school can see and get known about it. In same process Annual work-plan has been formulated in 2018.

**Planning meeting of Science Club at Razabarihat Girls High school**

**3. Science related wall magazine:** In high school level institutions under project, wall magazine is an important medium for showing creativity and talent of the students. It is an effective method for making student habituate about writing, drawing and newspaper reading from the childhood. Club members remain active with these activities. New scientific innovation, poem, story, documentary of science clubs, problems of local area etc publish through wall magazine. Science clubs formulate seven/nine noted wall magazine publish committee. Wall magazine also motivates student to write and those collected in specific time period. By collecting writings those publish in wall magazine after inspection. Wall magazine put up in a suitable place in respective schools whether everyone can see.

**4. School based science fair and quiz competition:** In project implementing institutions science club leadership organize science fair as an extra curriculum activity along with the regular educational activities. Science fair is creating science practicing opportunity for students. As a result students are getting interested about science education, erasing their fear and creating science friendly environment. Through fair students can prove and show presentation their study book theory and rules, in this way student are presenting innovative research based theories. This helps to improve their presentation capacity. To organize school base science fair one science fair organize committee formed in every school. This committee formulates planning and budget of science fair. For making science project respective schools science club help them. According to schedule time science fair held in those schools. **Quiz Competition:** Projected schools also organize Quiz competition. With quiz competition students get habituate about reading knowledgeable book along with text book and it's create knowledge practice environment. As a result student's knowledge about International topics, history, science etc are increasing and they can easily participate in competitive exam. During science fair quiz competition also held with interested students.

**School based Science Fair at A.F.G. Girls High School**

**5. “CCBVO-BFF inter-school science fair – 2018” preparation meeting:** On 23<sup>rd</sup> October, 2018 “CCBVO-BFF inter-school science fair – 2018” preparation meeting held in Huzrapur school conference. With financial help of CCBVO this meeting held where Md. Abul Kalam Azad, Head teacher of Huzrapur act as president of the meeting. For organizing **CCBVO-BFF inter-school science fair – 2018** successfully every educational institution head, local people representatives, civil society representatives and aide organization attend the meeting. In that meeting fair management committee formation, budget, date, guest selection, decoration, participants etc decided with every ones opinion.

**6. CCBVO-BFF inter-school science fair – 2018:** On 25<sup>th</sup> 2018 daylong “CCBVO-BFF inter-school science fair – 2018” held in Huzrapur School premises and Jamilur Rahman, President of Aristotle Science Club act as

chairman of the program. Md. Isahak Ali Biswas was present as a chief guest in the ceremony. All science clubs present their best innovative project in the fair. Statistical data enclosed at the end of description.

**Opening Ceremony of Inter School Science Fair at Huzrapur High School**

**Upazila Chairman Mr. Ishaq gives his Speech of Chief Guest in Inter School Science Fair at Huzrapur High School premises**

**7. Strategic planning meeting for self-reliant science club:** The main purpose of the strategic planning meeting is to increase science clubs capacity, so they can run self reliantly. Science club representatives, teachers, MCC representatives, guardians and prominent local people attend in the meeting. Here main discussion was how science clubs can operate their activities independently, how respective schools can help and local people can help them.

**Strategic planning meeting of science club at Premtoly Girls High School**

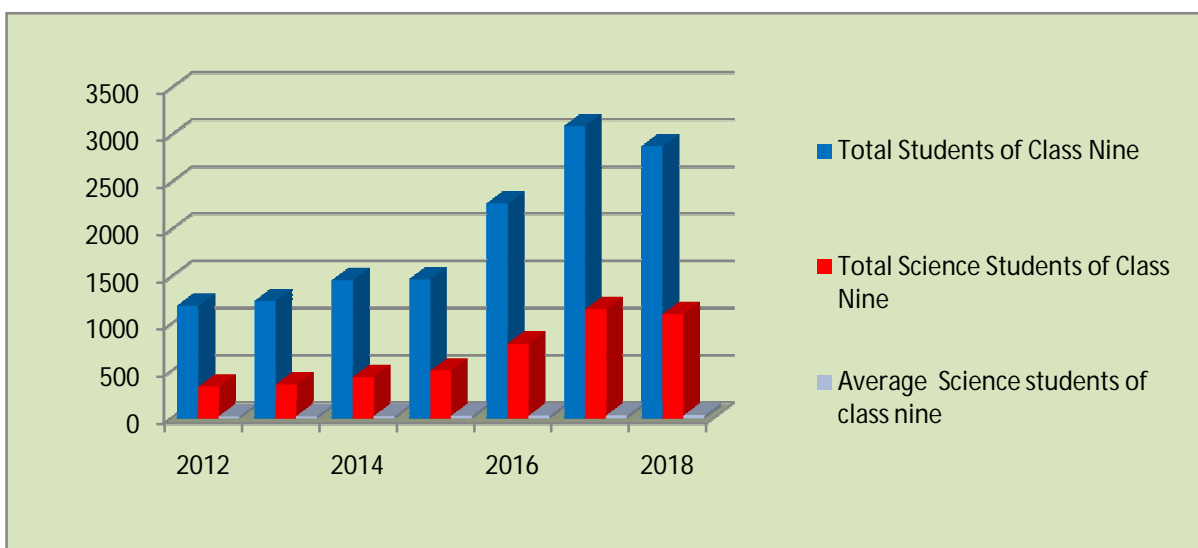

### 3.2.6. Project Target and Achievements:

21 | Page CCBVO\_ Annual Report- 2018

### 3.2.7. Results of Project Implementation:

Percentage of class IX science students in 40 educational institutions of Godagari and Paba (2012 to 2018).

Year	Total Students		Students of class IX		Science student of class IX		Percentage of Class IX science student
	Female	Male	Female	Male	Female	Male	
2012	3734	3525	611	590	138	202	28.30%
2013	3835	3573	681	569	154	214	29.44%
2014	4293	3932	770	699	220	224	30.22%
2015	4392	4266	702	778	214	296	34.45%
2016	6250	6023	1180	1103	396	403	34.99%
2017	8873	7765	1643	1460	605	559	37.51%
2018	8952	7936	1471	1418	538	571	38.38%

### 3.2.8. Project Output:

- 40 Science club has been formulated in 40 educational institutions, each year member is increasing.
- Proving text book theory and rules with low cost materials.
- Members of science clubs attending different District, Divisional and National level science related competition.
- Every science clubs using their school laboratory.

### 3.2.9. Project Outcome:

- In project implemented upazila 45 science established and about 70% of them running their activities self-reliantly.
- Educational institutions, Guardians, Local people, Local Administration and Local representative's awareness have increased and they are helping science clubs.
- Institutions students doing well in various public exams and further they're getting admitted Medical College, Engineering University and universities.
- In 2012 project implemented schools had 28.30% science students and in 2018 it stands 38.38%

### 3.2.10. Brief description of future plan:

- By conducting evaluation CCBVO has divided science clubs in three categories.
- 1st grade 14 science clubs can obtain their activities without any support.
- 2nd and 3rd grade 13 science clubs has lacking of capacity and efficiency in case of obtaining their activities. Additional support to increase capacity of these clubs will make them self-reliant.
- Tow year based breezing phase implement is necessary to enhance 2nd and 3rd grade science clubs capacity and efficiency.
- 40 science clubs will be followed up regularly.

## 3.3. Community Legal Service (CLS)

**3.3.1. Background:** Under Community Legal Service (CLS) program CCBVO is organizing “Human Rights Awareness Meeting” as well as provide legal support to the oppressed, marginal women and children and disadvantaged ethnic people with its own initiative. The main objectives of the program are to ensure justice for the oppressed and marginal people through legal awareness and social empowerment. At present this program is being implemented among the beneficiaries of Rokkhagola Food Security and Promoting Science Education programs.

**3.3.2. Program Goal:** Establishing law service rights of the oppressed, tenant and poor people.

**3.3.3. Strategies/ objectives of the program:**

- To build unity of the oppressed, marginal and ethnic people to establish their legal rights.
- To enhance legal aid opportunity for marginal women, child and ethnic people by erasing oppression, discrimination, poverty and inequality.
- To raise awareness of socially neglected and remote area belonging people about their rights.

**3.3.4. Working Area:** All Upazila, Municipality and City Corporation of Rajshahi District

**3.3.5. Achievements**

Sl.	Activities name	Target	Achievement	Population		
				Female	Male	Total
1.	Human Rights Awareness Meeting	8	6	95	75	170
2.	Legal aid support	10	7	89	100	189
3.	Social arbitration	20	15	1050	1200	2250

**3.3.6. Employee:** Women: 0, Man: 01, Total: 01

**3.3.7. Present activities:** CCBVO raising awareness of the leaderships of different social organization (Rokkhagola and Science clubs) about Legal aid services. If legal rights of the people hindered in any reason, CCBVO provides advice where they can get free legal aid.

Human Rights Awareness Meeting at Agolpur Rokkhagola

## 3.4.Campaign for Citizen Right to Information

**3.4.1. Background:** If Information rights law -2009 and people's right to information ensured then govt., autonomous, non-govt. institutions Transparency and Accountability will increase, corruption will reduce and good governance will be restored. Information Rights law will help to break secrecy traditions. Besides people can be government development partner. By using personal or cluster of information people will contribute to increase national production and socio-economic development of the country. So establish an information right is an essential need. With this goal CCBVO formulate Right to Information Movement Committee on 17<sup>th</sup> September 2011. This committee work as a brother organization of CCBVO.

**3.4.2. Goal of the program:** Capacity of people in acquiring information from government and non-government institution enhanced

**3.4.3. Objectives of the program:**

- Accessibility of the people in different institution increased.
- Peoples' organization transparency, accountability and good governance enhanced

**3.4.4. Activities:**

- a) Awareness meeting on Right to information: CCBVO increasing Information right awareness among various people's organization such as Rokkhagola village Organization, School based science clubs. 5 awareness meeting held at different Rokkhagola and school level science club in 2018.

# Governing body of CCBVO

According to the organizational constitution CCBVO has a General Body (GB) consisted of 29 members and an Executive Committee (EC) with seven members to control the organization.

**A) General body:** General body is highest platform of the organisation; the committee members shall have the right to participate and vote in election of EC, which has been for three years of period. This committee is consisted by life members and general members. General committee normally approves annual budget, income and expenditure statement and decisions of executive committee, annual plan of the organization. This committee has the authority to take any final decision for the betterment of the organization. Usually General Body meeting of CCBVO shall be held once in every calendar year, but special meeting of the committee could be arranged and all type of meeting called by General Secretary with the concurrence of the executive committee.

**B) Executive committee:** Executive committee is responsible to execute all approved decision and programs of the General Committee. The Executive Committee meeting shall hold quarterly and also special meeting of the committee could be arranged by General Secretary with the consent of the Chairman. The executive committee shall be responsible for staff recruitment, annual budget preparation, controlling discipline of the organization, collecting fund for project implementation, keeping income and expenditure statement to place in the general meeting for necessary approval.
